Dear Hiring Manager,

I hope this email finds you well. My name is Arth Kumar Das, and I am currently a 1st year B.Tech student majoring in Computer Science at Rungta International Skills University. I am writing to apply for the AI/ML Engineering Intern position at Indux Technology.

As a college student passionate about artificial intelligence and machine learning, I have been actively building my skills through coursework, personal projects, and self-learning. I am eager to gain practical industry experience and apply my knowledge to real-world challenges.

What I bring as an intern:

- Strong programming skills in Python and SQL
- Understanding of machine learning algorithms and data structures
- Hands-on experience through academic projects in data analysis and basic model building
- Familiarity with cloud-based AI workflows and deployment basics
- Enthusiasm to learn, adapt quickly, and contribute to team goals

I am particularly excited about Indux Technology because of its focus on practical AI/ML solutions and its learning-driven internship environment, which offers hands-on exposure to real-world projects. As a student eager to transition from theory to practice, I believe this internship would be an invaluable learning experience while allowing me to contribute meaningfully to your team.

I have attached my resume for your kind consideration. I am available for an internship starting February 2026 and can commit to a 2-month duration.

Thank you very much for considering my application. I look forward to hearing from you.

Warm regards,
Arth Kumar Das
1st Year Student, Computer Science
